

KinzeTM Insecticide Drop Tube Instructions – Rear Mount

Part No. SB020750: bolt-on attachment

Drop tube SB020750 is used for all SmartBox[®] system applications on KinzeTM planters and JD 7000 & 7100 series.

Installation Instructions:

1. Remove either the left or right gauge wheel assembly.
2. Remove the set screw/bolt and washer on the gauge wheels mounting shaft.
3. From the bottom of the row unit, insert the tubes inlet opening through the hole provided at the closing wheel's hinge point.
4. Use the set screw/bolt to fasten the tube to the row unit – the washer is not required. (NOTE: If you have problems starting the bolt, a slightly longer bolt may be required.)
5. The mounting tab on the tube may need to be adjusted so the guide foot is parallel to the ground. Reinstall gauge wheel assembly.

General Mounting Instructions: Your SmartBox[®] system requires that a minimum 45 degree angle be maintained at any point along the product discharge path from the meter outlet to the in-furrow drop tube. The drop tube may need to be bent to adjust. The plastic hose should be cut to length to eliminate any unnecessary slack that could cause a flow restriction. Also, if using a seed firmer the drop tube's foot (if applicable) may need to be cut off or bent up if restricting the firmer's travel.
