Impact With Staying Power™

- Proven take-down power of Impact® Herbicide that controls your toughest weeds and grasses.
- Industry leading level of acetochlor provides reliable residual control you can trust.

Strong to the Core™

- Trusted take-down of herbicide-resistant grasses and broadleaf weeds¹ such as **waterhemp**, **Palmer amaranth** and **giant ragweed**. Impact® Herbicide has proven performance year after year.
- Reliable residual control of herbicide-resistant grass and broadleaf weeds² has been the hallmark of acetochlor performance in corn weed control.

.Except for group 27 resistant weeds.

.Except for group 15 resistant weeds.

Fits the Way You Farm

- Delivers needed control across a wide range of field conditions.
- Provides control across a range of weed densities as an early postemergence following a planned preplant or preemergence application.
- Reliable delivery of needed control when wet conditions prevent a timely preplant or preemergence application.

GENTLE ON LIBERTYLINK® CORN. WICKED ON WEEDS™.

SINATE™ Herbicide controls herbicide-resistant and critical driver weeds in LibertyLink® corn with outstanding crop safety.

Smoke ‘Em If You Got ‘Em

The powerful one-two punch of Impact® Herbicide and glufosinate provides punishing efficacy in the fight against herbicide-resistant weeds like **waterhemp**, **Palmer amaranth** and **giant ragweed**.

GENTLE ON
LIBERTYLINK
CORN

Control You Can Count On

Growers know agronomic conditions must be just right for glufosinate to realize its maximum potential.

Combining Impact® Herbicide with glufosinate delivers more consistent performance on a wide spectrum of grass and broadleaf weeds.

Mazon, IL

**WICKED
ON WEEDS™**

LibertyLink® Corn Safe

- Impact® Herbicide is the Standard in Corn Safety®.
- The inherent tolerance of LibertyLink® corn trait to glufosinate helps **SINATE**® Herbicide deliver outstanding corn safety.
- **SINATE** Herbicide technology combined with the LibertyLink corn trait provides growers with the next generation in resistance management.
