

Almonds

iNvigorate® | B Sure® | UpLift®

PRODUCT APPLICATION AND TIMING FOR ALMONDS

B Sure®

- Supports plant productivity in a variety of environmental conditions
- Contains carbon, nitrogen, true protein, amino acids and essential metabolic micronutrients

iNvigorate®

- Highly productive microbial community when applied to the soil, assisting in nutrient uptake and improving fertilizer efficiency
- Promotes availability and absorption of nitrogen, phosphorus and potassium. Along with promoting a healthy soil microbial community, also promotes better fertilizer utilization and increased yield

UpLift®

- Fertility solution derived from organic, biologically-extracted chitin and additional critical nutrients
- Promotes robust soil microbial environment and interacts with the plant to increase crop productivity

B Sure®

Type Of Application	pt/A	Timing
Foliar	2 - 4	3 to 4 times per growing season ¹

¹With foliar nutrition, micronutrients and insecticides starting at pre bloom.

iNvigorate®

Type Of Application	pt/A	Timing
Soil	2 - 4	3 to 4 times per growing cycle ²

²From early through post harvest fertility applications.

UpLift®

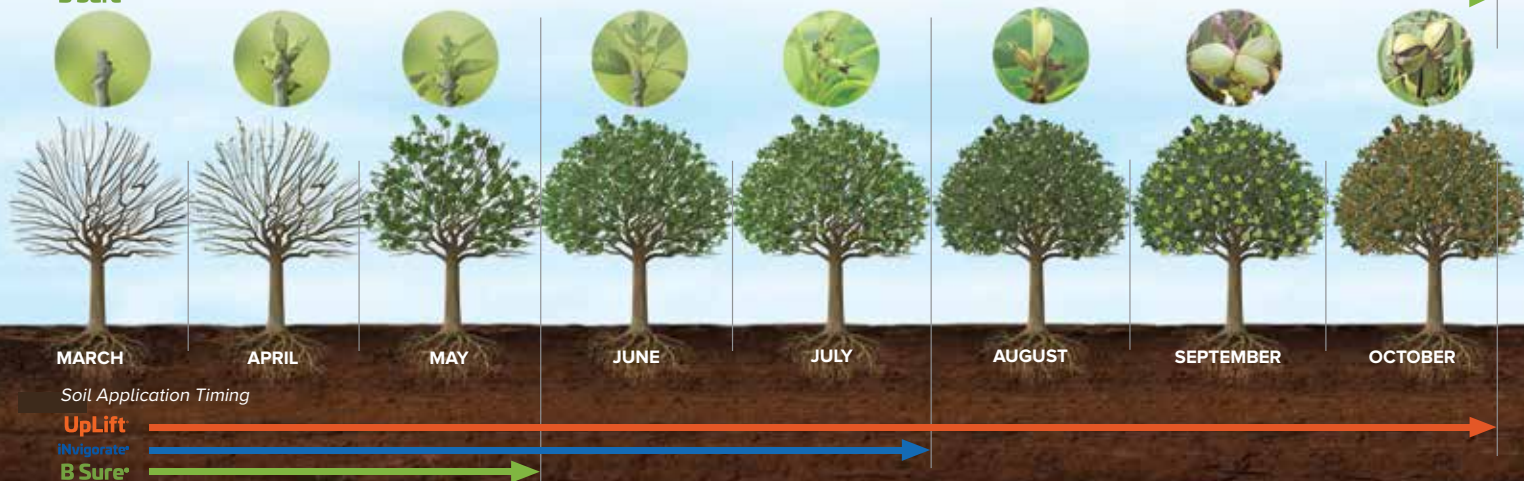

Type Of Application	lb/A	Timing
Soil	1 - 2	3 to 4 times per growing cycle ²

²From early through post harvest fertility applications.
