

Potatoes

iNvigate® | B Sure® | UpLift®

PRODUCT APPLICATION AND TIMING FOR POTATOES

B Sure®

- Supports plant productivity in a variety of environmental conditions
- Contains carbon, nitrogen, true protein, amino acids and essential metabolic micronutrients

iNvigate®

- Highly productive microbial community when applied to the soil, assisting in nutrient uptake and improving fertilizer efficiency
- Promotes availability and absorption of nitrogen, phosphorus and potassium. Along with promoting a healthy soil microbial community, also promotes better fertilizer utilization and increased yield

UpLift®

- Fertility solution derived from organic, biologically-extracted chitin and additional critical nutrients
- Promotes robust soil microbial environment and interacts with the plant to increase crop productivity

B Sure®

Type Of Application	pt/A	Timing
Foliar	1 - 4	Every 3 to 4 weeks ¹

¹With foliar nutrition, micronutrients, herbicides, insecticides and fungicides from early vegetative stage through bulking.

iNvigate®

Type Of Application	pt/A	Timing
Soil	2 - 4	From planting after soil fumigation through mid vegetative state ²

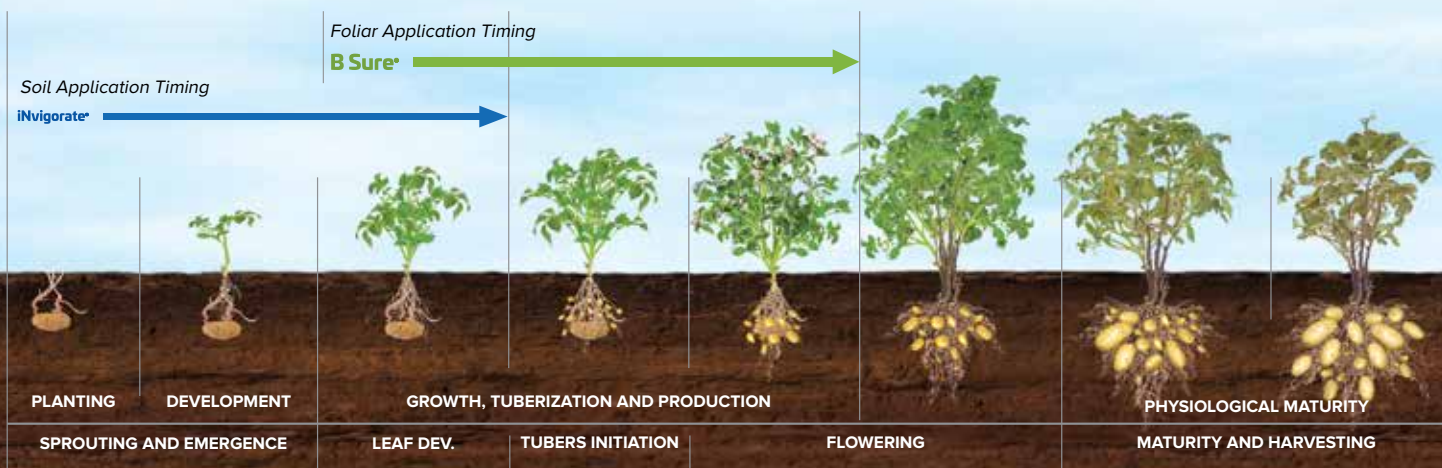

²With fertilizers, micronutrients, fungicides, herbicides or insecticides.

UpLift®

Type Of Application	lb/A	Timing
Soil	1 - 2	From planting after soil fumigation through mid vegetative state ²

²With fertilizers, micronutrients, fungicides, herbicides or insecticides.
