

Sugarcane

iNvigorate® | B Sure® | UpLift®

PRODUCT APPLICATION AND TIMING FOR SUGARCANE

B Sure®

- Supports plant productivity in a variety of environmental conditions
- Contains carbon, nitrogen, true protein, amino acids and essential metabolic micronutrients

iNvigorate®

- Highly productive microbial community when applied to the soil, assisting in nutrient uptake and improving fertilizer efficiency
- Promotes availability and absorption of nitrogen, phosphorus and potassium. Along with promoting a healthy soil microbial community, also promotes better fertilizer utilization and increased yield

UpLift®

- Fertility solution derived from organic, biologically-extracted chitin and additional critical nutrients
- Promotes robust soil microbial environment and interacts with the plant to increase crop productivity

B Sure®

Type Of Application	pt/A	Timing
Foliar	1 - 4	With herbicides, pesticides, foliar nutrition.
Soil	1 - 4	At planting ¹

¹With starter fertilizer, pre/post emergence herbicide programs and from side dress through canopy close-in with fertilizers.

iNvigorate®

Type Of Application	pt/A	Timing
Soil	2 - 8	At planting ¹

¹With starter fertilizer, pre/post emergence herbicide programs and from side dress through canopy close-in with fertilizers.

UpLift®

Type Of Application	lb/A	Timing
Soil	1 - 2	At planting ¹

¹With starter fertilizer, pre/post emergence herbicide programs and from side dress through canopy close-in with fertilizers.
