

Tomatoes

iNvigorate® | B Sure® | UpLift®

PRODUCT APPLICATION AND TIMING FOR TOMATOES

B Sure®

- Supports plant productivity in a variety of environmental conditions
- Contains carbon, nitrogen, true protein, amino acids and essential metabolic micronutrients

iNvigorate®

- Highly productive microbial community when applied to the soil, assisting in nutrient uptake and improving fertilizer efficiency
- Promotes availability and absorption of nitrogen, phosphorus and potassium. Along with promoting a healthy soil microbial community, also promotes better fertilizer utilization and increased yield

UpLift®

- Fertility solution derived from organic, biologically-extracted chitin and additional critical nutrients
- Promotes robust soil microbial environment and interacts with the plant to increase crop productivity

B Sure®

| Type Of Application | pt/A | Timing |
|---------------------|-------|---------------------------------|
| Foliar | 1 - 4 | Every 2 to 4 weeks ¹ |
| Soil | 1 - 4 | Every 2 to 4 weeks ² |

¹With foliar nutrition, fungicides, herbicides and insecticides from pre-bloom through harvest.

²From transplant to 60 days after transplant.

iNvigorate®

| Type Of Application | pt/A | Timing |
|---------------------|-------|---------------------------------|
| Soil | 2 - 4 | Every 3 to 4 weeks ³ |

³With fertilizers, micronutrients, fungicides, herbicides or insecticides from planting or transplant through harvest.

UpLift®

| Type Of Application | lb/A | Timing |
|---------------------|---------|---------------------------------|
| Soil | 0.5 - 1 | Every 3 to 4 weeks ³ |

³With fertilizers, micronutrients, fungicides, herbicides or insecticides from planting or transplant through harvest.
