

BETTER FERTILIZER EFFICIENCY. BETTER RESULTS.

Nothing Works Like iNvigorate® To Increase Your Crop Yields And Improve The Quality Of Your Crop

iNvigorate® promotes the absorption of nitrogen, phosphorous and potassium, along with maintaining a healthy soil microbial community. Results may increase nutrient availability, better fertilizer utilization and increased yields.

How iNvigorate Helps Your Crop Thrive

iNvigorate creates a highly productive microbial community when applied to the soil, assisting in nutrient uptake and improving fertilizer efficiency. Count on **iNvigorate** to:

- Free up nutrients bound to soil particles, so they become more available to the plant
- Optimize root growth to boost plant access to and absorption of available nutrients
- Rejuvenate the soil by increasing soil organic matter and building a robust microbial community

The iNvigorate Difference

Our proprietary process includes co-fermentation, which establishes a robust consortium of naturally occurring aerobic and anaerobic microbes. This means **iNvigorate** may benefit what you need for a successful harvest, including:

- Improved yield and enhanced crop quality
- Consistent results across a wide variety of soil and growing conditions
- Reliable performance even in stressful environments

| Type Of Application | pt/A | Timing |
|---------------------|-------|---------------------|
| Soil | 2 - 4 | Every 3 to 4 weeks* |

**From planting or transplant through harvest.*

To learn more, contact your retailer or local AMVAC representative.

iNvigorate may be mixed with most fertilizers, micronutrients, fungicides, insecticides or herbicides. Please check with your local AMVAC® representative for specific mixing questions.
