

FOLEX® 6EC COTTON DEFOLIANT DELIVERS RELIABLE LEAF DROP & BETTER COTTON QUALITY YEAR AFTER YEAR

Product Advantages

Folex® 6EC has been a trusted cornerstone of cotton defoliation programs for years—and for good reason. It delivers consistent, effective mature leaf drop, a critical step in successful defoliation. Its flexible rate structure ensures strong performance across a wide range of environmental conditions.

Unlike PPO defoliants, Folex adapts to both hot and cool temperatures—reducing the risk of stuck leaves in the heat and maintaining reliable defoliation in cooler weather with higher rates. This versatility not only supports more consistent results but also contributes to better cotton quality, season after season.

Key Benefits

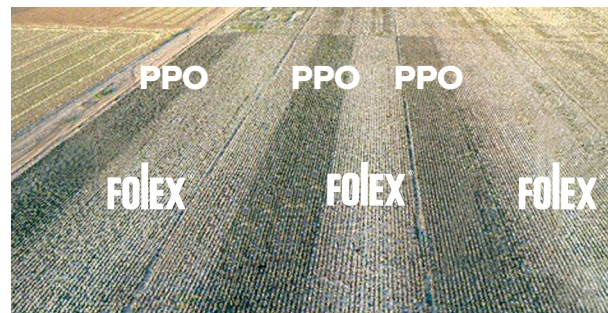

- Proven leaf drop of mature foliage
- Reliable performance across a wide temperature range
- Flexible rate structure reducing the risk of sticking leaves vs. PPO defoliants, leading to improved cotton quality.
- Enhances the effectiveness of other defoliants
- Improves TDZ uptake in drought-stressed cotton

Folex Outperforms PPO in Value and Defoliation*

Treatment	Folex 6EC at 12oz/A + Ethephon 32 oz/A	PPO Competitor at 1oz/A + Ethephon 32 oz/A
Yield	1,500 lbs/A	1,500 lbs/A
Leaf Avg.	2.1	2.75
Color	21	31
Price	56.27	55.12
Advantage/Acre	\$17.25	—
