

## UNDERSTANDING THE DEADLINE DIFFERENCES

The DEADLINE molluscicide products from AMVAC provide excellent slug and snail control across multiple crop types. DEADLINE® M-Ps™, DEADLINE® GT™ and DEADLINE® Bullets™ all utilize the same active ingredient, but provide different features and benefits depending on your operation's needs. Use the chart below to discover the differences.

	DEADLINE  M-Ps	DEADLINE  GT	DEADLINE  Bullets
<b>Active Ingredient</b>	Metaldehyde (2,4,6,8-Tetramethyl-1,3,5,7-tetraoxycyclo-octane)		
<b>Formulation</b>	Pellets	Extruded Granule	Pellets
<b>Color</b>	Blue	Blue	Tan
<b>Concentration</b>	4%	3%	4%
<b>Features/ Benefits</b>	<ul style="list-style-type: none"> <li>• Better pellet count per pound to provide more baiting points.</li> <li>• Attracts slugs and snails so they feed longer.</li> </ul>	<ul style="list-style-type: none"> <li>• Re-hardens multiple times for optimal effectiveness and longevity.</li> <li>• Long lasting: Resistant to rain and watering.</li> </ul>	<ul style="list-style-type: none"> <li>• Better pellet count per pound to provide more baiting points.</li> <li>• Natural coloring for non-dye applications.</li> </ul>
<b>Key Pest</b>	Slugs and Snails		
<b>Crops</b>	Field, tree, and vegetable crops. *See label for specific crop application.	Field, fruit, citrus, and vegetable crops. *See label for specific crop application.	Field, fruit, and vegetable crops. *See label for specific crop application.
<b>Application Timing</b>	Can be applied every 3 to 4 weeks during growing season, or as needed. *See label for specific crop application.	Number of applications allowed per season are indicated by specific crop on the label.	Can be applied every 3 to 4 weeks during growing season, or as needed. *See label for specific crop application.
<b>Rates</b> <small>*rate varies by crop, see label for details</small>	10 – 20 lbs/acre, 5 – 12 pellets / sq.ft.	13.3 – 33.3 lbs/acre	10 – 20 lbs/acre, 5 – 12 pellets / sq.ft.
<b>Application Instruction</b>	Apply as a soil surface treatment. Use a band treatment between the plant rows. Apply around the approved crops listed on the label. For optimum results, apply following rainfall, irrigation or onto damp soils in the evening.	Apply by hand or with commercial application equipment designed for banded application of granular products, unless broadcast application is specifically permitted for the crop being treated. For optimum results, apply following rainfall, irrigation or onto damp soils in the evening.	Apply as a soil surface treatment. Use a band treatment between the plant rows.
