

AZTEC® INSECTICIDE IMPROVES CONSISTENCY OF INSECT CONTROL AND HELPS DELIVER MORE YIELD

AMVAC®'s industry-leading corn soil insecticide brand and formulation for corn rootworm control.

Available in both legacy packages – SmartBox® and bag – for your application convenience.

AZTEC 4.67G Bags

- **AZTEC 4.67G** in a bag is a superior choice for mechanical granular insecticide box planter application with rates suited to the technology more easily calibrated.
- **AZTEC 4.67G** is also a great fit for Precision Planting® technology with their vDrive® electric meter insecticide system.

- Superior control of all species of corn rootworm.
- Dual modes of action provide broad-spectrum pest control.
- Apply with the precision planting system or standard granular insecticide boxes.
- Low-use rates for application efficiency.
- The formula for simple convenience, healthier roots and stronger stands.

Product	Formulation	Packaging	Rate per 1000 ft	Rate/A on 30-inch Row Spacing
AZTEC	4.67G	Bag	3 oz	3.27 lb

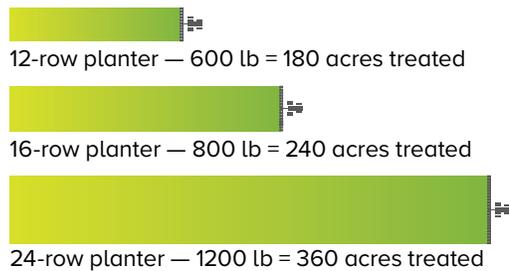

AZTEC® 4.67G SmartBox®: Proven Rootworm Control in a Cost-Effective Formula

- Superior control of all corn rootworm species
- Controls seed-attacking pests
- Delivers healthier roots and stronger stands
- Powered by 2 modes of action

AZTEC 4.67G SmartBox is an excellent fit on Precision Planting vDrive insecticide systems with an additional kit to allow SmartBox containers to fit above the Precision Planting meters and give excellent application featuring a closed handling system with SmartBox containers.

AZTEC 4.67G SmartBox Acres per Fill

Crops: Field corn, sweet corn, popcorn, corn grown for seed or silage

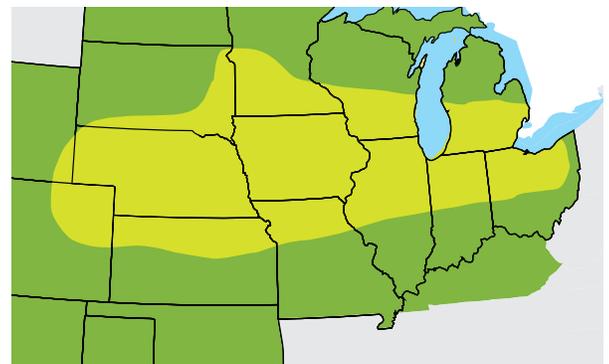

Standing corn with **AZTEC 4.67G** in-furrow (L) vs. lodged, untreated corn at harvest.

Get the Convenience and Proven Performance of AZTEC In-Furrow:

- Control all species of corn rootworm (northern, western, southern, Mexican) — including rotation-resistant variants of northern and western corn rootworm
- Control seed-attacking pests including cutworm, seedcorn beetle, seedcorn maggot, wireworm and white grub
- In-furrow application of **AZTEC** produces healthier roots and stronger stands, resulting in greater harvest efficiency and higher returns

Corn rootworms cause \$1 billion of damage every year.

AZTEC controls all species of corn rootworm including rotational variants of northern and western corn rootworm. Plus, seed-attacking pests: Cutworm, seedcorn beetle, seedcorn maggot, white grub and wireworm.
