

Same great control at half the rate

Almond growers have an innovative tool in the fight against spider mites and red mites with Abba ULTRA® miticide/insecticide from AMVAC.

Abba ULTRA is created with the most advanced formulation technology, providing exceptional efficacy while meeting California clean air standards. With twice the concentration of abamectin than other formulations, rate conversion is easy. Simply use half of the standard .15 abamectin rate. This innovative change with

ABBA ULTRA QUICK FACTS:

Active Ingredient: Abamectin 3.74%
Activity: Translaminar movement for extended residual control
Mode of Action: Chloride Channel Activators
Group Insecticide Number: 6
Signal Word: Warning
Formulation: Emulsifiable Concentrate
Restricted Use: Yes
Packaging Info: 4x1 gal. case; 36 cases/144 gals. = pallet

Abba ULTRA means half the storage, half the transportation and half the container disposal – saving users time and money without sacrificing performance.

An excellent foundational tool in a miticide spray program, Abba ULTRA has long-lasting residual control against a wide spectrum of mites including two-spotted spider mites, Pacific spider mites, strawberry spider mites and European red mites.

PEST	DILUTE SPRAYS ¹ USE RATE	CONCENTRATE SPRAYS ² USE RATE
Two-spotted spider mite Pacific spider mite Strawberry spider mite European red mite	1.25 – 2.5 fl. oz./100 gal. water <i>plus</i> 1 qt. horticultural spray oil*/100 gal. (i.e., 0.25% of finished spray)	5 – 10 fl. oz./A <i>plus</i> at least 1 gal. horticultural spray oil*/A

* Not a dormant oil.

¹ Rates per 100 gal. dilute spray are based on a 400 gal./acre spray volume.

² To determine the Abba ULTRA rate per acre for concentrate sprays, it is necessary to first determine the amount needed for a full cover dilute spray. Use the same amount of product per acre in concentrate sprays as required for dilute sprays to the same grove/orchard. The result can be less than 5 fl. oz./acre when used on smaller trees.

USE RESTRICTIONS:

Do not apply aerially.

Do not apply in less than 40 gallons of water per acre.

Do not re-treat within 21 days of the first application.

Do not apply more than 10 fl. oz./A of Abba ULTRA or any other foliarly applied abamectin product per application.

Do not apply more than 20 fl. oz./A of Abba ULTRA or any other foliarly applied abamectin product per cropping season.

Do not exceed 2 applications of Abba ULTRA or any other foliarly applied abamectin product per cropping season.

Do not apply within 21 days of harvest.

Do not allow livestock to graze treated groves or orchards.
