

Same great control at half the rate

Apple growers have an innovative tool in the fight against mites, tentiform leafminers and white apple leafhoppers with Abba ULTRA[®] miticide/insecticide from AMVAC.

Abba ULTRA is created with the most advanced formulation technology, providing exceptional efficacy while meeting clean air standards. With twice the concentration of abamectin than other formulations,

ABBA ULTRA QUICK FACTS:
 Active Ingredient: Abamectin 3.74%
 Activity: Translaminar movement for extended residual control
 Mode of Action: Chloride Channel Activators
 Group Insecticide Number: 6
 Signal Word: Warning
 Formulation: Emulsifiable Concentrate
 Restricted Use: Yes
 Packaging Info: 4x1 gal. case; 36 cases/144 gals. = pallet

rate conversion is easy. Simply use half of the standard .15 abamectin rate. This innovative change with Abba ULTRA means half the storage, half the transportation and half the container disposal – saving users time and money without sacrificing performance.

An excellent foundational tool in a miticide/insecticide spray program with rotation partners, Abba ULTRA provides proven performance at the right price.

PEST	DILUTE SPRAYS ¹ USE RATE	CONCENTRATE SPRAYS ² USE RATE
Two-spotted spider mite McDaniel spider mite European red mite Tentiform leafminers White apple leafhopper	1.25 – 2.5 fl. oz./100 gal. water <i>plus</i> 1 qt. horticultural spray oil*/100 gal. (i.e., 0.25% of finished spray)	5 – 10 fl. oz./A <i>plus</i> at least 1 gal. horticultural spray oil*/A

* Not a dormant oil.

¹ Rates per 100 gal. dilute spray are based on a 400 gal./acre spray volume.

² To determine the Abba ULTRA rate per acre for concentrate sprays, it is necessary to first determine the amount needed for a full cover dilute spray. Use the same amount of product per acre in concentrate sprays as required for dilute sprays to the same grove/orchard. The result can be less than 5 fl. oz./acre when used on smaller trees.

USE RESTRICTIONS:

- Do not apply aerially.
- Do not apply during bloom stage.
- Do not apply in less than 40 gallons of water per acre.
- Do not retreat within 21 days of the first application.
- Do not apply more than 10 fl. oz./A of Abba ULTRA or any other foliarly applied abamectin product per application.
- Do not apply more than 20 fl. oz./A of Abba ULTRA or any other foliarly applied abamectin product per cropping season.
- Do not exceed 2 applications of Abba ULTRA or any other foliarly applied abamectin product per cropping season.
- Do not apply within 28 days of harvest.
- Do not allow livestock to graze in treated orchards.
