

SAME GREAT CONTROL AT HALF THE RATE

Pecan growers have an innovative tool in the fight against pecan leaf scorch mites with **Abba Ultra**® Miticide/Insecticide from AMVAC®. **Abba Ultra** is created with the most advanced formulation technology, providing exceptional efficacy. With twice the concentration of abamectin than other formulations, rate conversion is easy. Simply use half of the standard .15 lb/gal abamectin rate. This innovative change with **Abba Ultra** means half the storage, half the transportation and half the container disposal – saving users time and money without sacrificing performance. An excellent foundational tool in a miticide spray program, **Abba Ultra** has long-lasting residual control against a wide spectrum of mites including pecan leaf scorch mites.

Abba Ultra Quick Facts

- Active Ingredient: Abamectin 3.74%
- Activity: Translaminar movement for extended residual control
- Mode of Action: Glutamate-gated chloride channel allosteric modulators
- Insecticide Group Number: 6
- Signal Word: Warning
- Formulation: Mircoemulsion
- Restricted Use: Yes
- Packaging Info: 4x1 gal case; 36 cases/144 gal = pallet

Pest	Dilute Sprays ¹ Use Rate	Concentrate Sprays ² Use Rate
Pecan leaf scorch mite	1.25–2.5 fl oz/100 gal water plus 1 qt horticultural spray oil*/100 gal (i.e. 0.25% of finished spray) for best performance	5–10 fl oz/A plus at least 1 gal horticultural spray oil*/A for best performance

*Not a dormant oil.

¹Rates per 100 gal dilute spray are based on a 400 gal/A spray volume.

²To determine the **Abba Ultra**, rate per acre for concentrate sprays, it is necessary to first determine the amount needed for a full cover dilute spray. Use the same amount of product per acre in concentrate sprays as required for dilute sprays to the same grove/orchard. The result can be less than 5 fl oz/A when used on smaller trees.

Use Restrictions:

- Do not apply aerially.
- Do not apply in less than 40 gallons of water per acre.
- Do not re-treat within 21 days of the first application.
- Do not apply more than 10 fl oz/A of **Abba Ultra** or any other foliarly applied abamectin product per application.
- Do not apply more than 20 fl oz/A of **Abba ULTRA** or 0.047 lb/A of abamectin via any foliar applied product per year.
- Do not exceed 2 applications of **Abba Ultra** or any other foliarly applied abamectin product per cropping season.
- Do not apply within 21 days of harvest.
- Do not allow livestock to graze treated groves or orchards.
