

# CONTROL YOU NEED, CONVENIENCE YOU WANT

**INDEX® Liquid At-Plant Insecticide**, with two modes of action, delivers broad spectrum, in-furrow control of corn rootworms and seed-attacking pests to maximize yield and protect seeds and roots.

## Liquid Option For Control of Corn Soil Pests

- Dual modes of action for consistency of control
- Broad spectrum control of rootworms and seed-attacking pests including: Cutworms, grubs, seedcorn maggot, wireworms and more
- Maximizes yield potential, regardless of hybrid choice
- Protects roots – improves harvest efficiency
- At-plant solution – label includes narrow-row corn
- No herbicide restrictions
- Use the liquid power of **INDEX** in field corn, seed corn, sweet corn and popcorn
- Consistently delivers more yield than traits alone

Maximize yield potential and protect seeds and roots – **INDEX** performs as well as granular insecticide standards and outperforms bifenthrin-only based products on corn rootworms. It is the ideal choice for your narrow row corn – or any row spacing you choose. No soil- or POST-applied herbicide restrictions.

Fast and easy – pump **INDEX** from a 15-gallon keg to the Dosatron® injection system 15-gallon tank. Apply in a minimum of two gallons of water as carrier. One keg of **INDEX** gives you 153 acres of protection at CRW rate on 30-inch rows, so you can plant fast and efficiently.

## Apply With Water or Liquid Starter Fertilizer as Carrier

- Using Dosatron system
- Using a converted Raven® system

Liquid insecticides have been shown to vary in mixing compatibility with starter fertilizers. For use directions on in-line injection of **INDEX** into starter fertilizers, refer to FIFRA 2(ee). Recommendation found at [AMVAC.com/Index](http://AMVAC.com/Index).

### INDEX® Liquid At-Plant Insecticide Yield Results Summary of 11 University Trials\*

\*Trials conducted in 2018 on a hybrid without corn rootworm traits. Yields (bu/A) adjusted to 15% moisture. **INDEX** applied in-furrow at 12.5 fl oz/A on 30-inch row spacing. Capture LFR, Force 3G and Force Evo applied in-furrow at labeled rates. All liquid insecticides applied with starter fertilizer at 5 GPA.

### APPLICATION USE RATES

Amount of INDEX Insecticide per 1,000 ft of row	Corn Row Spacing							
	15 in	20 in	22 in	30 in	30 in (Twin Row)	34 in	36 in	40 in
0.44 fl oz	15.3	11.5	10.5	7.7	15.3	6.8	6.4	5.8
0.51 fl oz	17.8	13.3	12.1	8.9	17.8	7.8	7.4	6.7
