

# GOT UNPROTECTED CORN ACRES THIS SEASON?

## Impact<sup>®</sup> and ImpactZ<sup>®</sup> Herbicides Provide a Solution

- **The Standard in Corn Safety<sup>®</sup>**
- One-pass control of emerged grass and broadleaf weeds with residual activity
- Improves application efficiency – no need to outline perennial grass areas
- Less affected by cool temperatures than glyphosate

### Recommended Tank Mix and Additives

Apply the following tank mix to corn when grass and broadleaf weeds are less than 3 inches in height:

**Residual group 15 herbicides<sup>1</sup>** (may include atrazine)<sup>2</sup> at labeled rates

plus

**Impact** at 0.75–1.0 fl oz/A OR **ImpactZ** at 8.0–10.7 fl oz/A

plus

**Methylated Seed Oil** at 2–4 qt/100 gal<sup>3</sup>

plus

**AMS** at 2.0–2.5 lb/A

(Apply using 15 gal of water/A)

<sup>1</sup> Follow application timing restrictions on the residual herbicide label for emerged corn.

<sup>2</sup> Minimum recommended atrazine rate is 0.25 lb active/A.  
Do not exceed maximum labeled rates when using atrazine for added residual control.

<sup>3</sup> Use 2 qt/100 gal with EC formulations only.

See our entire line of products at [AMVAC.com](http://AMVAC.com)

## ImpactZ Herbicide

Equivalent rates of active ingredient per acre

ImpactZ Rate (fl oz/A)	Impact Equivalent Rate (fl oz/A)	Atrazine Equivalent Rate (lb ai/A)	No. Acres Treated per 5 gal Case
8.0	0.75	0.25	80
10.7	1.0	0.33	60

### Mixing Order Recommendation for Impact/ImpactZ

When tank-mixing **Impact/ImpactZ** with recommended herbicides, add the other herbicides and other components in the following order while agitating:

1. Fill spray tank 0.5–0.75 full with clean water
2. Add water-soluble additives such as AMS or UAN
3. Add **Impact** or **ImpactZ** herbicide
4. Add other water-dispersible products such as dispersible granules, dry flowables, suspension concentrates or liquid flowables
5. Add water-soluble products
6. Add emulsifiable concentrates, including methylated seed oil (MSO) adjuvants
7. Fill the remainder of spray tank with water, and ensure thorough mixing of all products
