

# GET RELIABLE CONTROL OF NEMATODES & SOIL INSECTS

Nematodes and other soil insects are a costly threat to your crop's success. MOCAP® Nematicide-Insecticide branded products offer dependable, broad-spectrum control of soil insects and nematodes on all labeled crops to protect roots, nutrient uptake, and profitability this season.

## Product Advantages

- Dependable, broad-spectrum control of soil insects and nematodes on labeled crops for strong stands and protected yield potential
- Residual soil control of labeled pests
- Available in both a liquid formulation as well as a granular formulation for increased application flexibility

## Product Use

Timing: Preplant or At Plant (Option for Pre-Emergence or Post-Plant for Hops)  
Contact Activity Only – Not Systemic  
Through the Plant

## Key Pests

- Nematode species (cyst, lesion, root-knot, reniform, stubby-root, etc.)
- Corn rootworm
- Wireworm
- Cutworm (black, sandhill)
- White grubs
- Banded cucumber beetle
- Flea beetle larvae
- Lesser cornstalk borer
