

# PARAZONE®

3SL Herbicide

## The Preplant Burndown Solution for Over 100 Listed Crops

Parazone® 3SL Herbicide from AMVAC®

— Your unparalleled preplant burndown partner

- Labeled for preplant, preemergence, dormant crop, directed spray, harvest aid, crop defoliant and postharvest application
- Proven formulation of paraquat containing 3.0 lb ai /gal
- Excellent mixing characteristics
- Effective herbicide resistant weed management solution – Group 22 herbicide
- Controls small grass and broadleaf weeds and suppresses sedges
- Rate ranges and timings allow wide application options
- Use alone, in tank mixes or within planned programs
- Available in 2 x 2.5 gal cartons and in 265 gal minibulk

### General Instructions and Information

**Application:** As a contact herbicide, thorough coverage of target weeds is critical for effective weed control.

No soil residue allows immediate crop planting after application.

**Spray adjuvants:** Unless restricted by a tank mix partner label, add a nonionic surfactant (NIS) or crop oil concentrate (COC) with Parazone 3SL.

**See your authorized AMVAC® dealer for more information.**

## Parazone 3SL —Key Features and Benefits

Manage herbicide weed resistance in preplant burndown programs with fast, effective and economical control of grass and broadleaf weeds in a wide variety of crops.

**Multi-Crop Options:** Parazone 3SL is registered for use on over 100 listed crops including alfalfa, almonds, corn, cotton, wheat, sorghum, soybeans and sugarbeets.

**Weed Control:** Parazone 3SL controls small grass and broadleaf weeds and suppresses sedges. Activity may be slowed by cloudy, overcast and cool conditions; however, overall performance is not impacted.

**Weed Resistance:** Parazone 3SL has a different mode of action than glyphosate or glufosinate. This makes Parazone 3SL a good choice in your IPM program to manage difficult to control weeds, which have become resistant to certain herbicides.

**Tank Mix Flexibility:** Parazone 3SL is tank mix compatible with many other herbicides, which provides the opportunity to control larger weeds and add residual control. Consult the Parazone 3SL label for mixing instructions.

**Rainfast:** Parazone 3SL is rapidly adsorbed by plant foliage and is rainfast in 30 minutes.

**Use Rate:** Parazone 3SL is a concentrated formulation. Application rates vary from 0.4 to 2.7 pt/A, depending on usage pattern and size of weeds.

**RESTRICTED USE PESTICIDE**
